

Stroke Has a New Indicator

They say if you email this to ten people, you stand a chance of saving one life. Will you send this along?

Blood Clots/Stroke - They Now Have a Fourth Indicator, the Tongue

I will continue to forward this every time it comes around!

STROKE: Remember the 1st Three Letters..... **S. T. R..**

STROKE IDENTIFICATION:

During a BBQ, a woman stumbled and took a little fall - she assured everyone that she was fine (they offered to call paramedics)she said she had just tripped over a brick because of her new shoes.

They got her cleaned up and got her a new plate of food. While she appeared a bit shaken up, Jane went about enjoying herself the rest of the evening.

Jane's husband called later telling everyone that his wife had been taken to the hospital - (at 6:00 pm Jane passed away.) She had suffered a stroke at the BBQ. Had they known how to identify the signs of a stroke, perhaps Jane would be with us today. Some don't die. They end up in a helpless, hopeless condition instead.

It only takes a minute to read this.

A neurologist says that if he can get to a stroke victim within 3 hours he can totally reverse the effects of a stroke...totally. He said the trick was getting a stroke recognized, diagnosed, and then getting the patient medically cared for within 3 hours, which is tough.

RECOGNIZING A STROKE

Thank God for the sense to remember the '3' steps, STR. Read and Learn!

Sometimes symptoms of a stroke are difficult to identify.. Unfortunately, the lack of awareness spells disaster. The stroke victim may suffer severe brain damage when people nearby fail to recognize the symptoms of a stroke.

**Now doctors say a bystander can recognize a stroke
by asking three simple questions:**

S *Ask the individual to SMILE.

T *Ask the person to TALK and SPEAK A SIMPLE
SENTENCE (Coherently)

(i.e. It is sunny out today.)

R *Ask him or her to RAISE BOTH ARMS.

If he or she has trouble with ANY ONE of these tasks, call
emergency number immediately and describe the
symptoms to the dispatcher.

**New Sign of a Stroke ----- Stick out Your
Tongue**

NOTE: Another 'sign' of a stroke is this: Ask the person to
'stick' out his tongue. If the tongue is 'crooked', if it goes to
one side or the other that is also an indication of a stroke.
A cardiologist says if everyone who gets this e-mail sends
it to 10 people; you can bet that at least one life will be
saved.
